Date of Birth :18-05-1985 (Male) Report No :24-13680687

_____o_____

Patient who developed arrest post-injury and was followed-up in the intensive care unit after resuscitation, tracheostomized, was transferred to the intensive care unit of our hospital for further treatment and follow-up. Patient had extensive wounds on his body, and was operated on by Plastic Surgery department. Patient is conscious, non-cooperative, has spontaneous extremity motions, tracheostomized, in room air, with stable vital parameters. He is fed enteral formula through nasogastric tube. Patient is advised to have percutaneous endoscopic gastrostomy under elective conditions. Patient's general condition is stable, he is a care patient. Intensive care follow-up is not necessary. He can be followed-up on in a normal department in a hospital. He may be transferred back to his country if it is favourable.
