

# Invitation

## Improving care for cancer and NCDs It's happening. It's affordable. It works.

Thursday 5<sup>th</sup> July 2018  
13:15 to 14:30

Conference Room A  
UN Headquarters, New York

Supported by

THE PERMANENT MISSION OF THE HASHEMITE  
KINGDOM OF JORDAN TO THE UNITED NATIONS

On the sidelines of the UN Interactive Civil Society Hearing on NCDs, UICC is holding a roundtable event to explore how building treatment and care facilities for cancer and other NCDs supports stronger, sustainable health systems.

Without significant improvements in access to early detection, treatment and care for cancer and NCDs countries will

struggle to meet their commitments by 2025 and deliver effective universal health coverage (UHC).

Discussions will draw on successful country examples of building up treatment and care capacities, and how these are contributing to stronger health services for all patients.

### Moderator

**Dr Cary Adams**  
Chief Executive Officer,  
Union for International  
Cancer Control (UICC)
