I: PUBLIC HEALTH INFRASTRUCTURE, PARTNERSHIPS AND MULTISECTORAL COLLABORATION FOR NCDs AND THEIR RISK FACTORS

This module includes questions related to the presence of a unit or division in the ministry of health dedicated to NCDs and risk factors, staff and funding. It also includes an assessment of the existence of fiscal interventions as incentives to influence health behaviour and/or to raise funds for health-related activities. Finally, it assesses the existence of a formal multisectoral mechanism to coordinate NCD-related activities in sectors outside of health.

1) Is there a unit/branch/department in the ministry of health or equivalent with responsibility for NCDs and their risk factors? 2017

☐ Yes ☐ No ☐ Don't know

IF NO: Go to Question 2

Please provide a copy of an organizational chart indicating where the unit / branch / department responsible for NCDs is located.

1a) Please indicate the number of full-time-equivalent technical/professional staff in the unit/branch/department. 2017

IV: CAPACITY FOR NCD EARLY DETECTION, TREATMENT AND CARE WITHIN THE HEALTH SYSTEM

The questions in this module assess the health care systems capacity related to NCD early detection, treatment and care within the health care sector. Specific questions focus on availability of guidelines or protocols to treat major NCDs, and the tests, procedures and equipment related to NCDs within the health-care system. It also assesses the availability of palliative care services for NCDs.

1a) Please indicate whether evidence-based national guidelines/protocols/standards are available for the management (diagnosis and treatment) of each of the major NCDs through a primary care approach recognized/approved by government or competent authorities. Where guidelines/protocols/standards are available, please indicate their implementation status, when they were last updated and whether they contain standard criteria for the referral of patients from primary care to a higher level of care (secondary/tertiary).

	Cardiovascular Disease	Diabetes	Cancer	Chronic Respiratory Disease
