Good morning,

Hope you are well. The ITFDE summary has been published in WHO's *Weekly Epidemiological Record* (dated September 15). Please click on link below.

Have a blessed day.

Shandal

Subject: Summary of the 26th Meeting of the International Task Force for Disease Eradication - June 20, 2017

Importance: High

Dear Colleagues,

Again thank you for your support of the ITFDE meeting held in June. Please see the attached final summary of our discussion of new World Health Organization (WHO) goals for the elimination of hepatitis B infection (HBV) and hepatitis C infection (HCV) as public health threats. It will also be uploaded to the ITFDE shared folder and The Carter Center web site. The summary will be submitted to WHO's *Weekly Epidemiological Record* for publication.

Sincerely,

Stephen Blount
