Lithuania is one of the countries that seems to approach the end of the first wave of COVID-19 pandemic. Quarantine relaxations started already 6 weeks ago. There have been around 10 new daily cases reported in Lithuania over the past weeks under heavy targeted testing.

In this webinar Lithuanian representatives will give an overview of the key principles of the COVID-19 Management Strategy and share insights about dynamics of COVID-19 that lead to the specific evidence-based decisions. Speakers will also present approaches to strategic monitoring, forecasting and reacting to the virus outbreaks. Longer term approach, vision and principles of quarantine relaxation and the use of PPE will be covered as well.

First of all, this webinar is oriented towards professionals working in epidemiology, medicine, science, health sector, but everyone interested in COVID-19 management is very welcome to join.
